Profile

Bio I'm a senior PHP, Python & Node.js developer with 10 years of experience, mainly working with new web-related technologies, interested in large-scale, distributed systems as well as researching open problems.

- Objectives**
- Developing effective, high-quality software solutions.
 - Coordinating large-scale projects and defining project requirements.
 - Actively participating in decision-making and intra-team discussions.
 - Quickly learning new technologies and frameworks.

Work Experience

October 2015 - Present Aryafa
Lead Programmer

As a lead programmer, I manage a team of developers and designers to bring interesting projects to life. Also, I'm available as the main developer in complex and commercial projects. Although I am responsible for liaising with clients to ensure that all the jobs carried out comply with standards and our guidelines.

April 2013 - Present Caffecinema
Platform Developer, Server Administrator

As a developer and administrator, in Caffecinema (one of most important and most famous Iranian news and review website for film and television) we most handle high traffic in specific situations. So we use li3 framework for backend and technologies like Varnish and Redis to manage load and reduce CPU usage. The result is a fresh website with a flexible, modular and powerful backend.

February 2017 – May 2017 Metadata
Website API Developer (contractor/remote)

Metadata is a large source of ebooks and professional articles that implemented with AngularJs and REST API backend.

April 2014 - October 2015 SIIS Co
Senior Software Developer

at Saman Dadehpardazan, we focus on multimedia projects. The most important one was "Saman Spherical Dome", a project like dome projection systems, we built at Abbasabad Hills, Tehran. In two years we implement this distributed system with Qt framework. Although we worked on interactive projection systems and gain suitable results.

August 2011 - April 2014 Tebyan
Software Developer, Game Developer

I developed mini Adobe Flash games and in a bigger team, worked on HUD and In-game menu for 3rd person video games. Also wrote some code for gameplay logic.

April 2009 - August 2011 Samina Group
Web Developer

Development of backend and frontend web application, DevOperation, Data Analysis using PHP, MySQL, Javascript, HTML and CSS.

Education

2008 - 2012 Information Technology at Azad University of Mashhad
Degree: Bachelor Science

2017 – 2018 Machine Learning at Coursera
Score: 95.7%

2003 – 2006 Master CIW as ITBettters Institute
Score: 98%
